

Lancaster University Grid
Development Activity
Status report

Globus 2.0 installed successfully on
two machines

1. lapj

For Atlas Testbed tests

Communications with gridpp ok

(i.e. we had a green dot!)

2. fal000phys03

Development server on D0 Farm

Communications with Fermilab ok

Lancaster University

Atlas Testbed Activity Status report

- Atlas verification installed, awaiting release 1.1.
- Weekly teleconferences (but last 2 cancelled).
- Significant involvement in preparation for Atlas Data Challenges.
- Eva Bouhova has done 2/3 of DC0 production and worked on job preparation and verification.

Lancaster University

D0 Grid Development Activity

- A.Finch attended 3 day developers course in Edinburgh in January.
- Successfully used gridftp between Lancaster farm and Fermilab.
- Will set up the development machine as 'sam station'.
- Initially interested in integrating gridftp into SAM.
- Iain Bertram involved in preparing D0 software for integration with globus tools.
- D0 Grid post advertised.
Applications being reviewed.
